

*Fit n Drive*  
**AC EDGE**

*just when you need it most...*

Introducing the new **Value Line** of compressors by AC EDGE. The Value Line compressors are made with quality parts and processes to provide customers with a reliable and long-lasting alternative to remanufactured compressors. Competitive pricing also makes the Value Line an economic alternative to original equipment, without compromising performance or hassle-free installation.

### Vision

To be the leading aftermarket brand for automotive air-conditioning.

### Mission

Develop an effective aftermarket program and expand our scope of quality products at competitive prices.

### AC EDGE Profile

AC EDGE is a new corporate brand housed under Sanden Corporation, which has over 30 years of automotive air-conditioning expertise and is an established OE (Original Equipment) supplier to major car manufacturers. Supported by a team of engineers, AC EDGE is dedicated to providing a true drop-in replacement part, not the “will-fit” part that our competitors offer.

### Products

The AC EDGE line is an “all makes” line of compressors that provides replacement coverage for all popular brands of vehicles. Our goal is to provide a “one-stop” shop for automotive A/C repair professionals. The AC EDGE line has piston, scroll, or swash plate type compressors in fixed or variable displacement. No more searching through catalogue after catalogue to find what you need...AC/ EDGE has it!

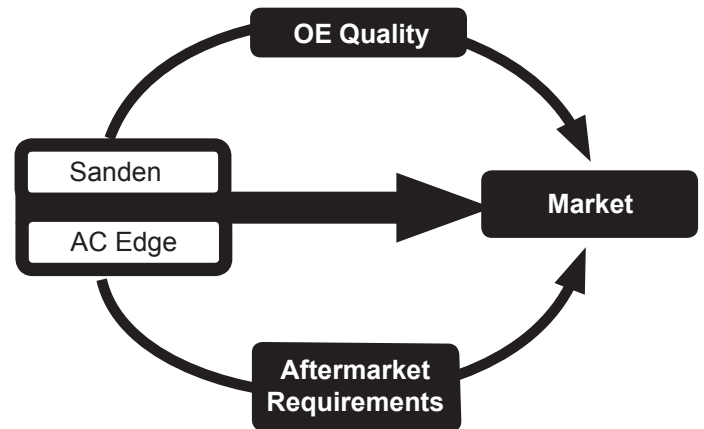

### Quality

Let’s face it, when it comes to buying replacement auto parts, quality can be a major concern. The marketplace is full of inexperienced compressor manufacturers claiming to have quality products and OEM fit. Often these products don’t fit, and even worse, they don’t last.

AC EDGE compressor are manufactured using quality parts and processes that are backed by Sanden, one of the world’s largest and most respected automotive air conditioning manufacturers.

Why bother with remanufactured compressors? “Reman” quality is no where near the quality of a new unit. AC EDGE’s competitive prices will make it easy to say goodbye to remanufactured compressors forever!

### AC EDGE Approach
